## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 2 states "said electrochromic fluid or electrolytic fluid is partially filled", the fluid itself cannot be partially filled, however, the surrounding partitions wall can be partially filled.

### ***Double Patenting***

Claims 1, 22-24 are rejected on the ground of nonstatutory double patenting over claims 11, 24 of U. S. Patent No. 6,927,892 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows:

Regarding claims 1, 22, 6,927,892 discloses a plurality of cells, each of said cells comprises: (a) surrounding partition walls,(claim 24) (b) an electrochromic fluid or electrolytic fluid filled therein(claim 11), and (c) a polymeric sealing layer which is formed from a sealing composition having a specific gravity lower than that of the electrochromic fluid or electrolytic fluid to enclose the electrochromic fluid or electrolytic fluid within each cell(claim 24).

Art Unit: 2873

Regarding claims 23, 24, 6,927,892 does not disclose the thickness of the bottom of the cell being 1 um. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a thickness of the bottom of the cell, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

### ***Allowable Subject Matter***

Claims 3-21, 25-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The allowable features being the specific type of fluid used; the sealing layer being in contact with the fluid.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2873

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
